Politics, after no longer being in perition to be accused of going into the burg constituency, sent Leon Gambetta to the French Assembly in 1871. It is argued that the seat held by the man whoconducted the resistance of France against Germany in the Franco-Prussian saloon, has now invaded the theatre. Last night Bertha Rembaus... the woman lawyer, with offices at 165 Broadway, who is a candidate on the Republican licket for a Municipal Court judgeship. has reported to have sought votes from the "Heillo, Alexander" company at the Forty-ninth Street, marking the first time on record that an office seeker has ever gone behind the scenes looking for he minds that rule the country.

It's almost indecent in such a pleasant entertainment to point out the flaws, but one must do one's duty by the public. ### In This Respect Hudson Has No Rival

The Super-Six Motor is Patented and Exclusive. It Added 72% to Power

Don't forget that no other car in the world has a motor like the Hudson

When you see a Hudson doing the things that only the highest powered cars can do, remember that in size, the Super-Six motor is not large and that it obtains its great power because of the patented principle which minimizes vibration.

> Adds to the Life of the Car, too

Vibration is the greatest destructive force about a motor car.

Vibration does far more damage than any shock received in useful service. You can see its destructive effects when a motor is raced.

Vibration absorbs power. By minimizing it, greater power is available for the operation of the car. And there is less strain and damage done through self destruction.

The records made by the Super-Siz were possible only because of its patented motor. It enabled the Hudson to maintain close to its maximum speed for hours, even days as in one test, without hammering itself to pieces.

### Now Note How Hudson Is Even Greater

Hudson records were made more than three years ago. Then 60,000 Super-Sixes were distributed to owners. Every. one became a help in making the present model a finer, better Hudson, of which 100 are delivered daily. The qualities of every detail were brought up to match the motor, that had reached s new high level of efficiency.

All men seem to know this. For four years Hudson has been the largest selling fine car. Practically every buyer has had to wait for delivery. Even now we are booking orders for advance delivery. That men will wait to get the car of their choice is proof of Hudson quality. What greater testimonial can there be?

### 300,000 Maxwell **Owners** Will O.K. This Car

OR this Post-War Maxwell contains all these fine traits of its 300,000 predecessors.

And in addition the great developments in engine, axle and chassis which the war brought.

But these 300,000 will vouch for its ability, for they have seen their own cars pile up endless mileage, outrun a guarantee on a tire, shy at the repair shop, and go where most other cars wouldn't follow.

They know, too, how thrifty it will prove on gas, how it will please both Son and Grandma in performance and comfort.

To say that they will O. K. this car is wasting words, for it is of the very same chassis model as the 300,000 others.

It's worth an hour of any man's time to look over the Post-War features, note what fine engineering has accomplished, and observe what big improvements have been made in appearance.
